Efficient Estimation of Word Representations in Vector Space (Original Word2Vec)

`https://arxiv.org/pdf/1301.3781.pdf`

Md. Nafis Faiyaz

May 16, 2021

1 Authors, Year and Title

2 Are any of the authors familiar? Do I know their other works?

3 Key terms and concepts yet to learn

Huffman tree based hierarchical softmax, Projection Layer, DistBlelief, Adagrad, New Log Linear Models, Equations for complexity in different architectures

4 Previous research and ideas (Introduction)

5 Reasoing for performing this research (Introduction)

6 Objectives of the study

7 Equipment/software used (Methods)

8 Variables being measured in experimentation (Methods)

9 Statistical tests? Results of them (Methods/Results)

10 Main Findings (Results)

11 How do these results fit into context of other research and their 'field'? (Discussion)

12 Explanation of each figure and their significance

13 Reproducibile? Is source code available?

14 My thoughts on results. Do they seem valid?
